With Friday being the worst day of the week, safe to assume everyone just wants to go home. Surprisingly August is the worst month, I guess the hot weather makes everyone a bit hot headed.

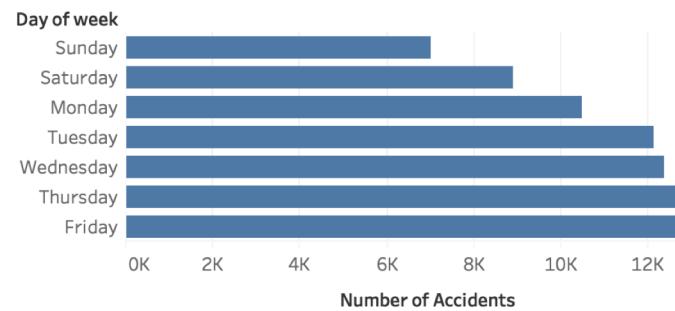

Worst Month for Accidents

Accidents per Month per Day

Worst Day for Accident

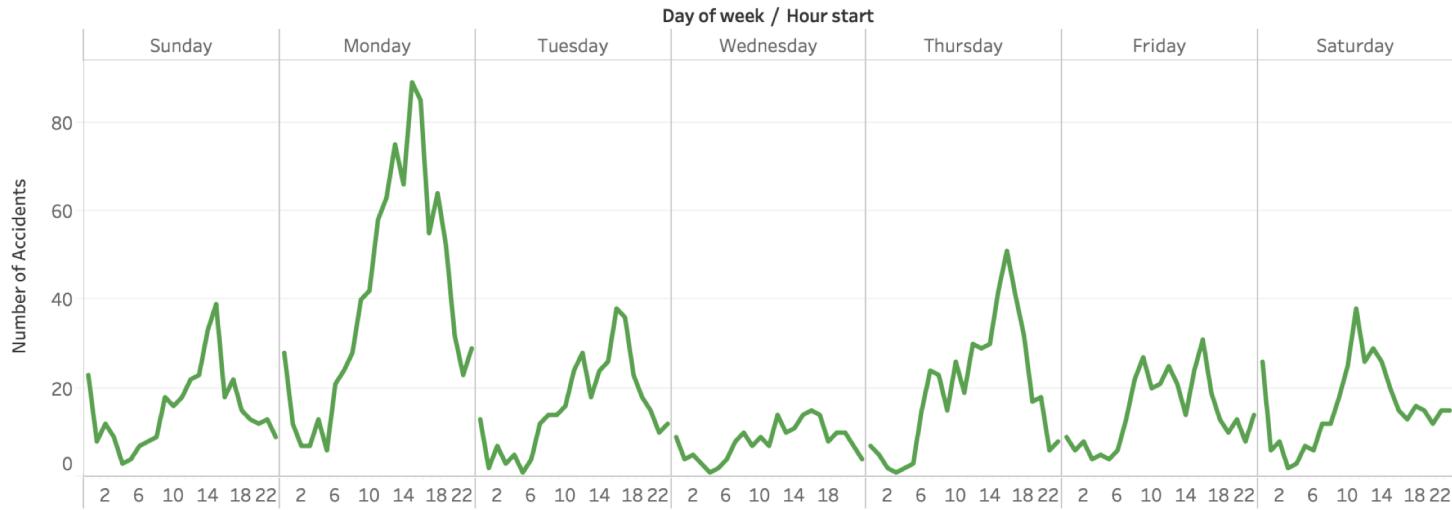

Most accidents happen near or close to the downtown core, safe to say those one way streets are helping no one

Map of Accidents per Month

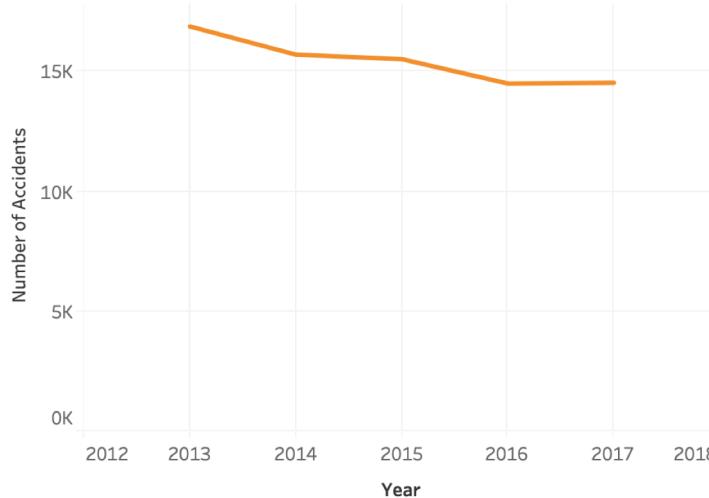

With monday night having the most amount of accidents, one can understand why Monday work days are the worst, we just want to go home. As the years progress, seems that we are becoming better drivers with less accidents...hopefully I didn't just jinx it.... Again we can see with hot weather comes a "hot" number of accidents..surprisingly there is alot of accdents around the 0 degree area, my understanding is that this can be attributed to the fall/spring weather where people just forget how to drive with the sudden change in s..

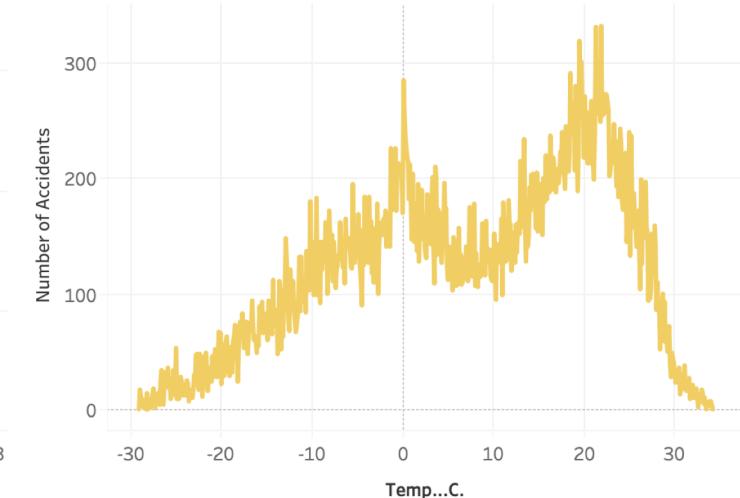

Accident per Day per Hour

Accident per Year

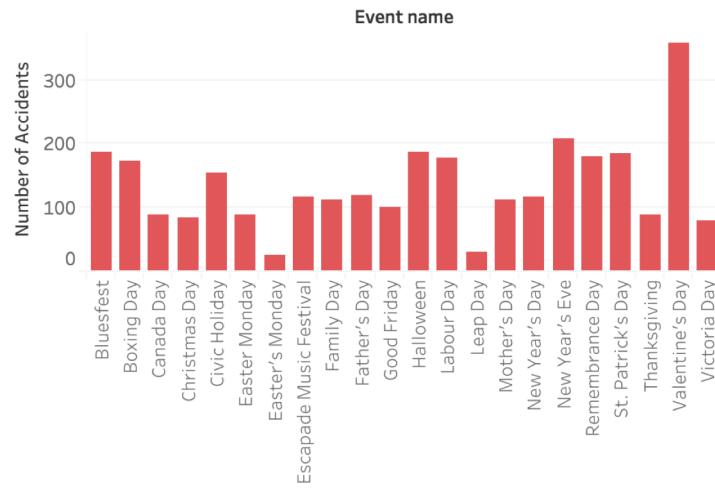

Accident per Temperature

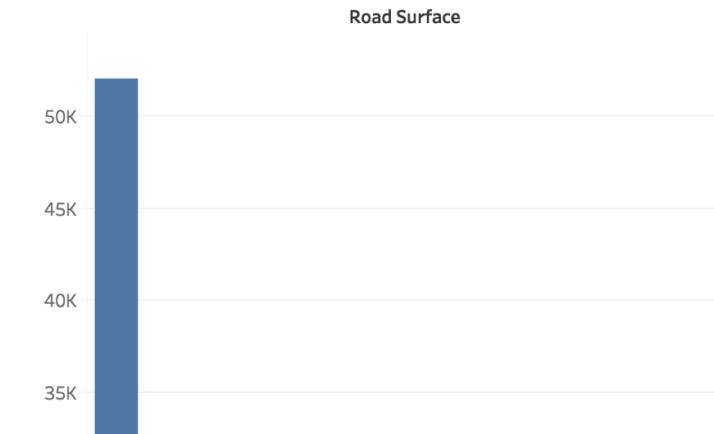

Seems like everyone feels the Valentine stress with it having the most amount of accidents.

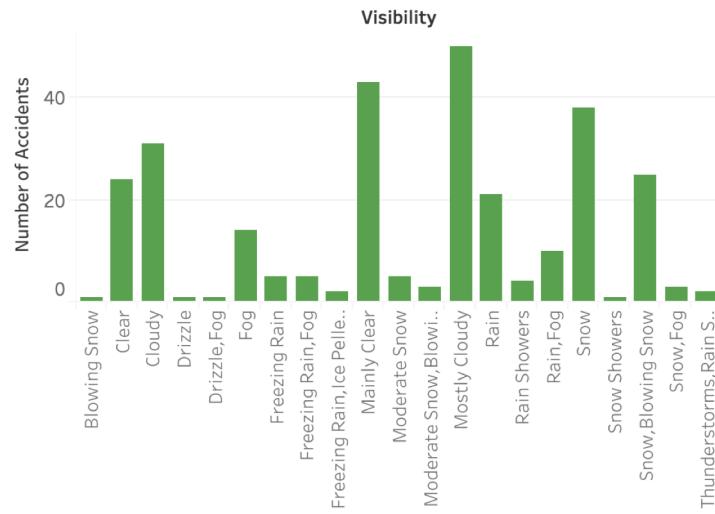

Accident per Event

Worst Road Surface

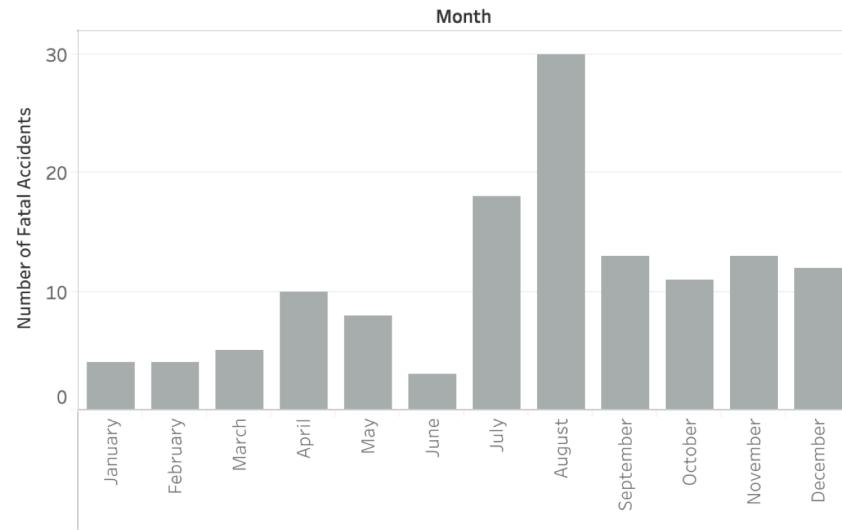

Accident per Visibility

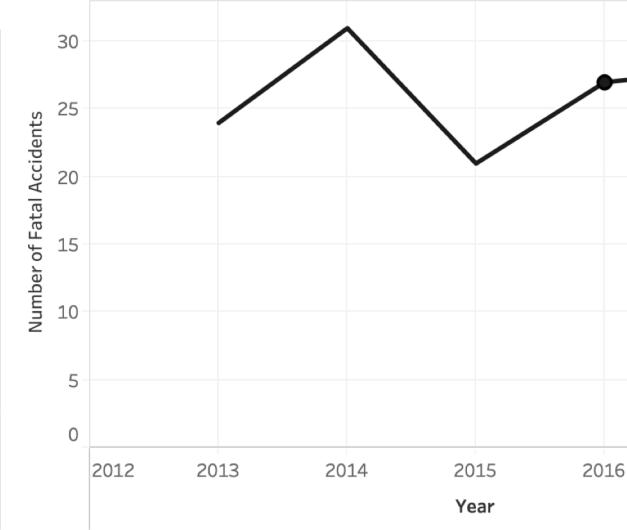

Surprisingly the worst streets/intersection
are not also the deadliest

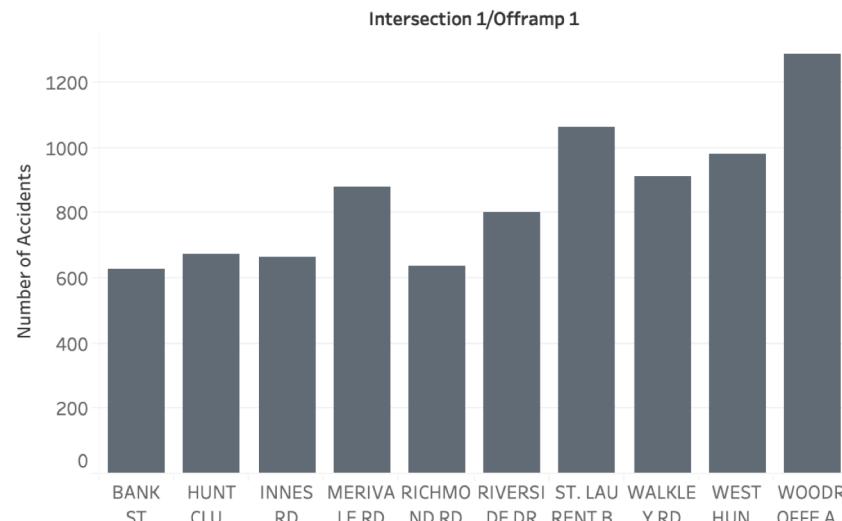

Months with most Fatal Accidents

Fatal Accident per Year

10 Worst Locations

Most Deadly Locations
